### Scope and objective

Chemical sciences represent an unique position among the different discipline in science the versatility of chemistry lies in the case with which it form overlap region with other discipline such as biology, medicine, physics, engineering ,etc. the overlap region form a rich resources for diverse application of science to humanity .chemistry embodies many branches of research pursuits such as organic, inorganic, physical ,analytical chemistry etc. the progress of research in chemical sciences has been phenomenal leading to emergence of many sub disciplines such as material sciences ,solid state and surface science, nanoscience and technology, chemical biology and others.

The conference is the first of its kind being organized by chemistry department sir Sayyed College of arts, commerce and science and it aims to bring student, faculties, researcher, scientist and academicians from various organization on a common platform where they can share and exchange their views, knowledge and learn from this scientific gathering, the conference will highlight recent development in chemistry education and related field and create awareness amongst people of the region.

The conference will cover the following broad areas.

- Organic synthesis
- Pharmaceutical and medicinal chemistry
- Green chemistry
- Nanomaterials
- Supramolecular chemistry
- Recent trends in catalysis
- Applied inorganic chemistry
- Analytical chemistry
- Organometallics
- Environmental chemistry
- Applied physical chemistry

Research papers pertaining to the themes of **NCRTCE-2013** are invited for oral/poster presentation. the selected full length paper will be published in the conference proceeding with ISBN number.**NCRTCE-2013** will give an excellent opportunity for participant to interact with one another, exchange ideas and initiates steps for scientific collaborations.
